

# SHOULD YOU WEAR A MASK?

OMC IS MASK OPTIONAL, HERE'S WHAT THAT MEANS:

## MASK ON

Masking is still required in settings where patients are at greatest risk.

Patients being seen with symptoms of respiratory illness (for example, COVID or RSV) must wear a mask.

Clinicians may ask patients or family members to wear a mask based on symptoms.

## MASK OFF

If patients, visitors, clinicians, and OMC team members are comfortable, and not asked to wear a mask based on symptoms, they can choose not to wear a mask at OMC.
